## Projects

### 1 - Freshly.com Clone, E-commerce (Individual)

A react web application project to deliver food items

**GitHub Link**

**Features:-**

- Login & Signup (authentication)
- Fetching data from the *REST API*, sorting the data along with the filtering method using *Axios*.
- Created the whole *application UI* by using **Chakra UI**.

**Areas of responsibility:-**

Navbar, Footer, How it works, On the menu, Login  
SignUp, Help, Plans & menu

**Tech-Stack used: ReactJS, Chakra UI, REST API, Axios.**

An individual project built by me, executed in 3 days

### 2 - Pharameasy Clone, Medicine selling (Group)

A web application project to deliver all medicines

**GitHub Link**

**Features:-**

- Login & Signup (authentication), payment, cart
- Products listing, filtering and sorting
- We have given almost all the functionalities of the original website along with maintaining the design as precise as possible.

**Areas of responsibility:-**

Navbar, Footer, Products

**Tech-Stack used: HTML, CSS, JavaScript(ES6&ES5)**

A Collaborative project built by a team of 4 developers, executed in 4 days

### 3 - Bellavita.com Clone, E-commerce (Group)

A web application project to deliver cosmetics products.

This is the first project of my CS journey

**GitHub Link**

**Features:-**

- Login & Signup, payment, cart,
- We used dummy data for listing, sorting and filtering all products

**Areas of responsibility:-**

Navbar, Product Page, Login

**Tech-Stack used: HTML, CSS, JavaScript(ES5)**

A Collaborative project built by a team of 6 developers, executed in 4 days
